संकेतिक : अनुप्रेषण की योगता के अनुसार, अधिकांश छात्र विषय को छोड़कर सभी विषयों में अर्जित ग्रेड बिन्दुओं का औसत है। छात्रों को परीक्षा की पूर्णतः अनुपस्थिति के लिए एक अतिरिक्त विषय लेने से उनका संकेतिक ग्रेड बिन्दु में से है।
ग्रेड बिन्दु की विवरणात्मक संख्या तथा अंकों की प्रतिशतता की सहाय निम्नानुसार की जा सकती है :
* विषयवार अंकों की विवरणात्मक प्रतिशतता = 0.5 x विषय का ग्रेड
* अंकों की सहाय विवरणात्मक प्रतिशतता = 0.5 x संकेतिक

As per Scheme of Studies (GPA) is the average of Grade Points obtained in all the subjects excluding additional 5th subject. However, for candidates who have offered one compulsory subject under CBSE, his/her GPA is out of 6 subjects. An indicative equivalence of Grade Point and Percentage of Marks can be calculated as follows :
* Subject wise indicative percentage of marks = 0.5 x GP of the subject
* Overall indicative percentage of marks = 0.5 x GPA

Additional :

संचित ग्रेड बिन्दु का औसत (संकेतिक) Cumulative Grade Point Average (CGPA) :

5.4

* कक्षा और अवधि की शैली (एएसएल) के आकलन में ग्रेड Grade in Assessment of Speaking and Listening Skills (ASL) :

B1

2 (क) (A) जीवन कौशल Life Skills :

जीवन कौशल Life Skills		कक्षा Class IX	ग्रेड Grade	कक्षा Class X		ग्रेड Grade
		वर्णनात्मक सूचक Descriptive Indicators		वर्णनात्मक सूचक Descriptive Indicators		
चिंतन कौशल Thinking Skills	Easily identifies personal strengths and weaknesses and uses them to arrive at meaningful decisions, raises questions, capable of independent thinking, has exceptional problem- solving and decision- making skills.	A	Identifies personal strengths and weaknesses, analyses a problem with relevant information and usually chooses appropriate alternatives and makes meaningful decisions.	B		
सामाजिक कौशल Social Skills	Empathetic, Displays sensitivity towards differently-abled students, possesses good interpersonal skills and appreciates other opinions, accepts feedback from teachers, elders and peers for self-improvement, and an excellent team worker.	A	Empathetic, with good interpersonal and communication skills, usually observes school rules, and responds appropriately and takes feedback and criticism positively.	B		
भावनात्मक कौशल Emotional Skills	Self-confident, optimistic, manages personal challenges and adverse situations with effectively and constructively, handles stress well, expresses and emotions appropriately and readily takes help when needed.	A	Identifies weaknesses, stress and negative emotions fairly well and manages them with self confidence and is empathetic.	B		

2 (ख) (B) कार्य शिक्षा Work Education :

कार्य शिक्षा Work Education	Has a satisfactory grasp of assigned tasks, shows involvement, helpful and is usually punctual.	C	Innovative and shows involvement in any assignment, and helps and guides others readily, applies knowledge practically and is punctual.	B
--------------------------------	---	---	---	---

2 (ग) (C) दृश्य और प्रदर्शन कला Visual and Performing Arts :

दृश्य और प्रदर्शन कला Visual and Performing Arts	Quite interested and open to learning, sometimes participates in artistic activities, rarely exhibits creativity in any art form.	D	Participates in artistic activities, quite creative, interested, appreciates and understands various art forms.	C
---	---	---	---	---

2 (घ) (D) अभिवृत्ति एवं मूल्य Attitudes and Values :

के प्रति towards		वर्णनात्मक सूचक Descriptive Indicators	ग्रेड Grade	वर्णनात्मक सूचक Descriptive Indicators	ग्रेड Grade
अध्यापक Teachers		Very courteous towards teachers, observes school norms, ready to help and communicates and confides in them.	B	Very courteous towards teachers, follows school rules, has a positive attitude and takes criticism in the right spirit.	B
सहपाठी Schoolmates		Expresses ideas and opinions with clarity, is sensitive and supportive towards peers and differently-abled schoolmates, receptive to new ideas and suggestions, inspires others and manages diversity well. Code of Conduct for Students

This document indicates the standard procedures and practices of UniKaksha for all students who are enrolling with us to pursue different courses. All students must know that it is incumbent upon them to abide by this Code of Conduct. The purpose of UniKaksha enforcing this Code is to pioneer and administer a student discipline process that is egalitarian, conscientious, productive, and expeditious; as well as, to promote student growth through individual and collective responsibility. All students are expected to be well conversant with this Code of Conduct.

A. Batch group decorum is to be maintained

Maintaining a sense of organisation and respect within a batch group is essential to the success of any team. When participating in online classes, it is important that all students follow certain rules to ensure that everyone feels respected, appreciated, and heard. Additionally, all conversations must remain respectful and polite at all times; this includes refraining from using offensive language or making comments that could be seen as offensive or inappropriate.

B. Class timings are to be followed

Adherence to class timings for students is important for helping them stay focused throughout their classes and ensuring that they do not miss out on any key information given by their trainer. It is essential that there is clarity around the expected start time and end time of the classes. Establishing clear expectations about timings creates an environment where everyone respects each other as well as themselves, leading to better learning outcomes overall.

C. The required documents are to be furnished as soon as possible

All documents required for various formalities, such as Adhar Cards and PAN Cards, should be provided to the UniKaksha Admissions Team whenever requested.

D. Induction attendance is compulsory

In order to provide an effective introduction to the UniKaksha and the TechFit courses, attendance is compulsory for all students during the induction session. The trainers will spend this time interacting with students and learning about their expectations, as well as introducing the courses briefly.

E. Classroom behaviour etiquette to be maintained

It is required for all students to have good classroom behaviour etiquette as it is essential in order to create a safe and productive learning environment. It ensures that both students and trainers are able to focus on their tasks with minimal disruption.

- It's important for students to respect their peers, trainers & mentors. This includes refraining from talking when others are speaking.
- Students are not permitted to do recording of either audio or video of the lectures delivered online without prior permission from the trainer/mentor.
- Students are not permitted to provide audio and video clippings of any class session to any other person or to any print and/or electronic media without prior permission.
- Students are not permitted to create any separate groups other than those made by Mentors or the Operations Team for smooth communication, if found there may be legal actions for the same.
- Students coming here should be focused on our products and should not create their own or poach other students to join for such. Any such activity will be treated as a malpractice and will lead to serious legal implications as per the IT acts.

A. Batch group decorum is to be maintained

Maintaining a sense of organisation and respect within a batch group is essential to the success of any team. When participating in online classes, it is important that all students follow certain rules to ensure that everyone feels respected, appreciated, and heard. Additionally, all conversations must remain respectful and polite at all times; this includes refraining from using offensive language or making comments that could be seen as offensive or inappropriate.

B. Class timings are to be followed

Adherence to class timings for students is important for helping them stay focused throughout their classes and ensuring that they do not miss out on any key information given by their trainer. It is essential that there is clarity around the expected start time and end time of the classes. Establishing clear expectations about timings creates an environment where everyone respects each other as well as themselves, leading to better learning outcomes overall.

C. The required documents are to be furnished as soon as possible

All documents required for various formalities, such as Adhar Cards and PAN Cards, should be provided to the UniKaksha Admissions Team whenever requested.

D. Induction attendance is compulsory

In order to provide an effective introduction to the UniKaksha and the TechFit courses, attendance is compulsory for all students during the induction session. The trainers will spend this time interacting with students and learning about their expectations, as well as introducing the courses briefly.

E. Classroom behaviour etiquette to be maintained

It is required for all students to have good classroom behaviour etiquette as it is essential in order to create a safe and productive learning environment. It ensures that both students and trainers are able to focus on their tasks with minimal disruption.

- It's important for students to respect their peers, trainers & mentors. This includes refraining from talking when others are speaking.
- Students are not permitted to do recording of either audio or video of the lectures delivered online without prior permission from the trainer/mentor.
- Students are not permitted to provide audio and video clippings of any class session to any other person or to any print and/or electronic media without prior permission.
- Students are not permitted to create any separate groups other than those made by Mentors or the Operations Team for smooth communication, if found there may be legal actions for the same.
- Students coming here should be focused on our products and should not create their own or poach other students to join for such. Any such activity will be treated as a malpractice and will lead to serious legal implications as per the IT acts.

AWS Certified Cloud Practitioner (CLF-C01) Exam Guide

Introduction

The AWS Certified Cloud Practitioner (CLF-C01) exam is intended for individuals who can effectively demonstrate an overall knowledge of the AWS Cloud independent of a specific job role.

The exam validates a candidate's ability to complete the following tasks:

- Explain the value of the AWS Cloud
- Understand and explain the AWS shared responsibility model
- Understand security best practices
- Understand AWS Cloud costs, economics, and billing practices
- Describe and position the core AWS services, including compute, network, databases, and storage
- Identify AWS services for common use cases

Target candidate description

The target candidate should have 6 months, or the equivalent, of active engagement with the AWS Cloud, with exposure to AWS Cloud design, implementation, and/or operations. Candidates will demonstrate an understanding of well-designed AWS Cloud solutions.

Recommended AWS knowledge

The target candidate should have the following knowledge:

- AWS Cloud concepts
- Security and compliance within the AWS Cloud
- Understanding of the core AWS services
- Understanding of the economics of the AWS Cloud

What is considered out of scope for the target candidate?

The following is a non-exhaustive list of related job tasks that the target candidate is not expected to be able to perform. These items are considered out of scope for the exam:

- Coding
- Designing cloud architecture
- Troubleshooting
- Implementation
- Migration
- Load and performance testing
- Business applications (for example, Amazon Alexa, Amazon Chime, Amazon WorkMail)

To view a detailed list of specific tools and technologies that might be covered on the exam, as well as lists of in-scope AWS services, refer to the Appendix.

Exam content

Response types

There are two types of questions on the exam:

- **Multiple choice:** Has one correct response and three incorrect responses (distractors)
- **Multiple response:** Has two or more correct responses out of five or more response options

Select one or more responses that best complete the statement or answer the question. Distractors, or incorrect answers, are response options that a candidate with incomplete knowledge or skill might choose. Distractors are generally plausible responses that match the content area.

Unanswered questions are scored as incorrect; there is no penalty for guessing. The exam includes 50 questions that will affect your score.

Unscored content

The exam includes 15 unscored questions that do not affect your score. AWS collects information about candidate performance on these unscored questions to evaluate these questions for future use as scored questions. These unscored questions are not identified on the exam.

Exam results

The AWS Certified Cloud Practitioner exam is a pass or fail exam. The exam is scored against a minimum standard established by AWS professionals who follow certification industry best practices and guidelines.

Your results for the exam are reported as a scaled score of 100–1,000. The minimum passing score is 700. Your score shows how you performed on the exam as a whole and whether or not you passed. Scaled scoring models help equate scores across multiple exam forms that might have slightly different difficulty levels.

Your score report may contain a table of classifications of your performance at each section level. This information is intended to provide general feedback about your exam performance. The exam uses a compensatory scoring model, which means that you do not need to achieve a passing score in each section. You need to pass only the overall exam.

Each section of the exam has a specific weighting, so some sections have more questions than others. The table contains general information that highlights your strengths and weaknesses. Use caution when interpreting section-level feedback.

Content outline

This exam guide includes weightings, test domains, and objectives for the exam. It is not a comprehensive listing of the content on the exam. However, additional context for each of the objectives is available to help guide your preparation for the exam. The following table lists the main content domains and their weightings. The table precedes the complete exam content outline, which includes the additional context. The percentage in each domain represents only scored content.

Domain	% of Exam
Domain 1: Cloud Concepts	26%
Domain 2: Security and Compliance	25%
Domain 3: Technology	33%
Domain 4: Billing and Pricing	16%
TOTAL	100%

Domain 1: Cloud Concepts

1.1 Define the AWS Cloud and its value proposition

- Define the benefits of the AWS cloud including:
 - Security
 - Reliability
 - High Availability
 - Elasticity
 - Agility
 - Pay-as-you go pricing
 - Scalability
 - Global Reach
 - Economy of scale
- Explain how the AWS cloud allows users to focus on business value
 - Shifting technical resources to revenue-generating activities as opposed to managing infrastructure

1.2 Identify aspects of AWS Cloud economics

- Define items that would be part of a Total Cost of Ownership proposal
 - Understand the role of operational expenses (OpEx)
 - Understand the role of capital expenses (CapEx)
 - Understand labor costs associated with on-premises operations
 - Understand the impact of software licensing costs when moving to the cloud
- Identify which operations will reduce costs by moving to the cloud
 - Right-sized infrastructure
 - Benefits of automation
 - Reduce compliance scope (for example, reporting)
 - Managed services (for example, RDS, ECS, EKS, DynamoDB)

1.3 Explain the different cloud architecture design principles

- Explain the design principles
 - Design for failure
 - Decouple components versus monolithic architecture
 - Implement elasticity in the cloud versus on-premises
 - Think parallel

Domain 2: Security and Compliance

2.1 Define the AWS shared responsibility model

- Recognize the elements of the Shared Responsibility Model
- Describe the customer's responsibility on AWS
 - Describe how the customer's responsibilities may shift depending on the service used (for example with RDS, Lambda, or EC2)
- Describe AWS responsibilities

2.2 Define AWS Cloud security and compliance concepts

- Identify where to find AWS compliance information
 - Locations of lists of recognized available compliance controls (for example, HIPPA, SOCs)
 - Recognize that compliance requirements vary among AWS services
- At a high level, describe how customers achieve compliance on AWS
 - Identify different encryption options on AWS (for example, In transit, At rest)
- Describe who enables encryption on AWS for a given service
- Recognize there are services that will aid in auditing and reporting
 - Recognize that logs exist for auditing and monitoring (do not have to understand the logs)
 - Define Amazon CloudWatch, AWS Config, and AWS CloudTrail
- Explain the concept of least privileged access

2.3 Identify AWS access management capabilities

- Understand the purpose of User and Identity Management
 - Access keys and password policies (rotation, complexity)
 - Multi-Factor Authentication (MFA)
 - AWS Identity and Access Management (IAM)
 - Groups/users
 - Roles
 - Policies, managed policies compared to custom policies
 - Tasks that require use of root accounts
 - Protection of root accounts

2.4 Identify resources for security support

- Recognize there are different network security capabilities
 - Native AWS services (for example, security groups, Network ACLs, AWS WAF)
 - 3rd party security products from the AWS Marketplace
- Recognize there is documentation and where to find it (for example, best practices, whitepapers, official documents)
 - AWS Knowledge Center, Security Center, security forum, and security blogs
 - Partner Systems Integrators
- Know that security checks are a component of AWS Trusted Advisor

Domain 3: Technology

3.1 Define methods of deploying and operating in the AWS Cloud

- Identify at a high level different ways of provisioning and operating in the AWS cloud
 - Programmatic access, APIs, SDKs, AWS Management Console, CLI, Infrastructure as Code
- Identify different types of cloud deployment models
 - All in with cloud/cloud native
 - Hybrid
 - On-premises
- Identify connectivity options
 - VPN
 - AWS Direct Connect
 - Public internet

3.2 Define the AWS global infrastructure

- Describe the relationships among Regions, Availability Zones, and Edge Locations
- Describe how to achieve high availability through the use of multiple Availability Zones
 - Recall that high availability is achieved by using multiple Availability Zones
 - Recognize that Availability Zones do not share single points of failure
- Describe when to consider the use of multiple AWS Regions
 - Disaster recovery/business continuity
 - Low latency for end-users
 - Data sovereignty
- Describe at a high level the benefits of Edge Locations
 - Amazon CloudFront
 - AWS Global Accelerator

3.3 Identify the core AWS services

- Describe the categories of services on AWS (compute, storage, network, database)
- Identify AWS compute services
 - Recognize there are different compute families
 - Recognize the different services that provide compute (for example, AWS Lambda compared to Amazon Elastic Container Service (Amazon ECS), or Amazon EC2, etc.)
 - Recognize that elasticity is achieved through Auto Scaling
 - Identify the purpose of load balancers
- Identify different AWS storage services
 - Describe Amazon S3
 - Describe Amazon Elastic Block Store (Amazon EBS)
 - Describe Amazon S3 Glacier
 - Describe AWS Snowball
 - Describe Amazon Elastic File System (Amazon EFS)
 - Describe AWS Storage Gateway
- Identify AWS networking services
 - Identify VPC
 - Identify security groups
 - Identify the purpose of Amazon Route 53
 - Identify VPN, AWS Direct Connect
- Identify different AWS database services
 - Install databases on Amazon EC2 compared to AWS managed databases

- Identify Amazon RDS
- Identify Amazon DynamoDB
- Identify Amazon Redshift

3.4 Identify resources for technology support

- Recognize there is documentation (best practices, whitepapers, AWS Knowledge Center, forums, blogs)
- Identify the various levels and scope of AWS support
 - AWS Abuse
 - AWS support cases
 - Premium support
 - Technical Account Managers
- Recognize there is a partner network (marketplace, third-party) including Independent Software Vendors and System Integrators
- Identify sources of AWS technical assistance and knowledge including professional services, solution architects, training and certification, and the Amazon Partner Network
- Identify the benefits of using AWS Trusted Advisor

Domain 4: Billing and Pricing

4.1 Compare and contrast the various pricing models for AWS (for example, On-Demand Instances, Reserved Instances, and Spot Instance pricing)

- Identify scenarios/best fit for On-Demand Instance pricing
- Identify scenarios/best fit for Reserved-Instance pricing
 - Describe Reserved-Instances flexibility
 - Describe Reserved-Instances behavior in AWS Organizations
- Identify scenarios/best fit for Spot Instance pricing

4.2 Recognize the various account structures in relation to AWS billing and pricing

- Recognize that consolidated billing is a feature of AWS Organizations
- Identify how multiple accounts aid in allocating costs across departments

4.3 Identify resources available for billing support

- Identify ways to get billing support and information
 - Cost Explorer, AWS Cost and Usage Report, Amazon QuickSight, third-party partners, and AWS Marketplace tools
 - Open a billing support case
 - The role of the Concierge for AWS Enterprise Support Plan customers
- Identify where to find pricing information on AWS services
 - AWS Simple Monthly Calculator
 - AWS Services product pages
 - AWS Pricing API
- Recognize that alarms/alerts exist
- Identify how tags are used in cost allocation

Appendix

Which key tools, technologies, and concepts might be covered on the exam?

The following is a non-exhaustive list of the tools and technologies that could appear on the exam. This list is subject to change and is provided to help you understand the general scope of services, features, or technologies on the exam. The general tools and technologies in this list appear in no particular order. AWS services are grouped according to their primary functions. While some of these technologies will likely be covered more than others on the exam, the order and placement of them in this list are no indication of relative weight or importance:

- APIs
- Cost Explorer
- AWS Cost and Usage Report
- AWS Command Line Interface (CLI)
- Elastic Load Balancers
- Amazon EC2 instance types (for example, Reserved, On-Demand, Spot)
- AWS global infrastructure (for example, AWS Regions, Availability Zones)
- Infrastructure as Code (IaC)
- Amazon Machine Images (AMIs)
- AWS Management Console
- AWS Marketplace
- AWS Professional Services
- AWS Personal Health Dashboard
- Security groups
- AWS Service Catalog
- AWS Service Health Dashboard
- Service quotas
- AWS software development kits (SDKs)
- AWS Support Center
- AWS Support tiers
- Virtual private networks (VPNs)

AWS services and features

Analytics:

- Amazon Athena
- Amazon Kinesis
- Amazon QuickSight

Application Integration:

- Amazon Simple Notification Service (Amazon SNS)
- Amazon Simple Queue Service (Amazon SQS)

Compute and Serverless:

- AWS Batch
- Amazon EC2
- AWS Elastic Beanstalk

- AWS Lambda
- Amazon Lightsail
- Amazon WorkSpaces

Containers:

- Amazon Elastic Container Service (Amazon ECS)
- Amazon Elastic Kubernetes Service (Amazon EKS)
- AWS Fargate

Database:

- Amazon Aurora
- Amazon DynamoDB
- Amazon ElastiCache
- Amazon RDS
- Amazon Redshift

Developer Tools:

- AWS CodeBuild
- AWS CodeCommit
- AWS CodeDeploy
- AWS CodePipeline
- AWS CodeStar

Customer Engagement:

- Amazon Connect

Management, Monitoring, and Governance:

- AWS Auto Scaling
- AWS Budgets
- AWS CloudFormation
- AWS CloudTrail
- Amazon CloudWatch
- AWS Config
- AWS Cost and Usage Report
- Amazon EventBridge (Amazon CloudWatch Events)
- AWS License Manager
- AWS Managed Services
- AWS Organizations
- AWS Secrets Manager
- AWS Systems Manager
- AWS Systems Manager Parameter Store
- AWS Trusted Advisor

Networking and Content Delivery:

- Amazon API Gateway
- Amazon CloudFront
- AWS Direct Connect
- Amazon Route 53
- Amazon VPC

Security, Identity, and Compliance:

- AWS Artifact
- AWS Certificate Manager (ACM)
- AWS CloudHSM
- Amazon Cognito
- Amazon Detective
- Amazon GuardDuty
- AWS Identity and Access Management (IAM)
- Amazon Inspector
- AWS License Manager
- Amazon Macie
- AWS Shield
- AWS WAF

Storage:

- AWS Backup
- Amazon Elastic Block Store (Amazon EBS)
- Amazon Elastic File System (Amazon EFS)
- Amazon S3
- Amazon S3 Glacier
- AWS Snowball Edge
- AWS Storage Gateway

Take the AWS Cloud Quest Challenge and get 25% off your AWS Certified Cloud Practitioner exam!*

Role-playing game to build AWS Cloud skills

Complete all 12 assignments by Jun 30, 2023 to earn the exam discount voucher. 📍

Want to learn more? Watch these 6 Twitch Episodes to help you prepare for your Cloud Quest: Cloud Practitioner Challenge: bit.ly/3AyVOz9

Cloud Quest

Learn AWS Cloud fundamentals in 3 hours

AWSome Day Online Conference is a free, one-day cloud training delivered by AWS technical instructors designed to enable you with AWS Cloud concepts, core AWS services, and ways these services enable innovation. AWSome Day is ideal for beginners with no prior cloud knowledge, as well as IT managers, system engineers, system administrators, developers and architects who are eager to learn how to get started on AWS Cloud.

Why attend?

Understand the powerful cloud computing advantages of cost-savings, speed, agility, and scale. Get introduced to compute, storage, database, networking, and security and learn how to accelerate innovation using IoT, machine learning, and more!

FREE Foundational AWS Builders Labs

Only on event day (8 June): Explore 5 foundational labs - available only to attendees. AWS Builder Labs help you practice your cloud skills in a live sandbox environment, risk-free and on-demand.

Certificate of attendance

Complete watching all 5 modules and get your certificate of attendance.

Don't forget to prepare your cloud questions and get them answered live at the event.
